This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Aronia Berry Concentrate Liquid competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Aronia Berry Concentrate Liquid is a high-purity liquid extract obtained from fresh aronia berry juice via low-temperature vacuum concentration, preserving most of the bioactive compounds such as anthocyanins (up to 2000-4000mg/100mL), proanthocyanidins, and organic acids. This deep burgundy-colored concentrate has an intense tart-sweet profile and can be diluted for direct consumption or used as a natural colorant and nutrient booster in beverages, jams, and liquid supplements. Compared to regular juice, it offers 5-10 times higher concentration of active ingredients with reduced water content for easier storage and transportation.
