Report Overview

Artificial nails, also known as fake nails, false nails, fashion nails, nail enhancements, acrylic nails, nail wraps, or nail extensions, are extensions placed over fingernails as fashion accessories. Some artificial nail designs attempt to mimic the appearance of real fingernails as closely as possible, while others may deliberately stray in favor of an artistic look. Unlike most manicures, artificial nails require regular upkeep; it is recommended that they are attended to, on average, every two weeks, however they may last up to about one month. Nonetheless, their versatility in terms of shape and design and comparatively high durability are some advantages they hold over other types of manicures.

The global Artificial Nails market size was estimated at USD 868.80 million in 2023 and is projected to reach USD 1094.58 million by 2032, exhibiting a CAGR of 2.60% during the forecast period.
