Report Overview

Artificial sausage casings can be made from materials such as collagen, cellulose, and plastic and may not always be edible. Collagen casings have been around the longest and are produced from animal collagen, mostly from the hides of cows and pigs. Sometimes the bones and tendons are included, and the casings can also be made from poultry and fish. An inexpensive choice, collagen casings are easier to use than natural casings as they provide better weight and size control of the sausage.
