### Report Overview

Asbestos-free fiber cement board is a building material that is used for various construction applications. It is an alternative to traditional fiber cement boards that contained asbestos, a hazardous material known for its negative health effects. Asbestos-free fiber cement board is manufactured without the use of asbestos fibers. Instead, alternative fibers, such as cellulose, synthetic fibers, or mineral fibers, are used to reinforce the cement matrix. These fibers provide strength and stability to the board without posing the health risks associated with asbestos.
