Abstracts

Automatic feeding systems are technologically advanced agricultural or livestock management solutions designed to automate the precise delivery of feed to animals, eliminating the need for manual distribution while enhancing efficiency and consistency. These systems typically integrate components such as storage silos, conveyors, programmable dispensers, sensors, and control software, enabling scheduled, portion-controlled feeding based on factors like animal type, age, weight, and nutritional requirements. By reducing labor dependency, minimizing feed waste, and supporting optimized animal health and growth, these systems cater primarily to modern farming operations?including dairy, poultry, swine, and aquaculture?seeking to scale production, improve resource management, and ensure operational reliability.
