Abstracts

This report studies the Automatic Transfer Switches market. An automatic transfer switch (ATS) is a device that automatically transfers a power supply from its primary source to a backup source when it senses a failure or outage in the primary source. When a failure occurs in a primary power system, the ATS invokes a standby power source, such as an uninterruptable power supply. An ATS can also start up more long-term backup power systems, such as local diesel generators, to run electric equipment until utility power is restored. Global Automatic Transfer Switches key players include GE, Eaton, Cummins, Briggs & Stratton, ABB, etc. Global top five manufacturers hold a share about 50%. United States and Europe is the largest market, both with a share about 30%, followed by Japan, with a share about 20 percent.
