Report Overview

The automatic ultrasonic bark stopper is an intelligent barking stopper designed specifically for pet dogs. It uses a built-in high-precision dog barking sensor to monitor and identify the dog's barking in real time. Once the dog's barking is sensed, the bark stopper will automatically trigger and send out an ultrasonic signal. The frequency of this ultrasonic wave is between the human ear and the dog's hearing. Only dogs can sense it, but humans cannot hear it. The stimulation of the ultrasonic wave will make the dog feel uncomfortable, thereby effectively reducing or stopping the dog's barking behavior.
