Benefits such as reduced production downtime, improved food safety, maintenance of high sanitation standards, and more flexibility in production processes will increase the adoption of optimized CIP among industries in the next four years. Existing enterprises in various industries have started implementing IOT (internet of things) in various sectors such as supply chain, raw materials sourcing, and bottle manufacturing. IOT enables bottling factories to increase their productivity at the machine level and also help in reducing inventory. It also facilitates beverage companies to transform operations in multiple areas, reduce maintenance costs and eliminate breakdowns
