Report Overview

In order to reduce the noise pollution, many nations have started implementing new regulations, which results in high demand for low-frequency sound-absorbing insulation materials to lower noise level in vehicles. For instance, in 2014, the European Union adopted new regulations to reduce the noise produced by passenger cars, light commercial vehicles, buses, light trucks, coaches, and trucks. For passenger cars, buses, and light trucks, the limit values will be lowered in two steps of 2 decibel A-weighting (dB[A]) each. For heavy-duty vehicles, the reduction will be 1 dB(A) for the first step and 2 dB(A) for the second step.
