Abstracts

Automotive airbag systems are passive safety devices designed to protect vehicle occupants by rapidly inflating upon collision impact, thereby cushioning occupants and reducing the risk of severe injury from contact with interior structures. These systems consist of multiple airbag modules?such as frontal, side, curtain, and knee airbags?along with sensors, an electronic control unit (ECU), and an inflator mechanism that work together to detect crash severity and deploy accordingly. Advanced systems now incorporate multi-stage deployment, occupant detection sensors, and integration with other safety technologies like seatbelt pretensioners, forming a critical part of modern vehicle passive safety systems mandated by regulatory standards worldwide.

The global Automotive Airbag Systems market size was estimated at USD 21950.0 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 6.50% during the forecast period.
