Report Overview

Antifreeze is an additive added to lower the freezing point of the vehicle and achieve boiling point elevation. This allows for a higher coolant temperature, which is vital for the automobile in a hot environment.

The market for ethylene glycol as antifreeze is very large globally and commands the highest market share in 2017. However, rising environmental concerns and tight emission norms are reducing its use and subsequently, its market share is expected to go down by the end of the forecast period. Propylene glycol antifreeze would be the fastest growing segment due to its environment-friendly nature and its lower emissions compared to the ethylene glycol based antifreeze. The market for propylene glycol antifreeze is expected to grow the fastest in the Europe and North American regions. Bosson Research's latest report provides a deep insight into the global Automotive AntifreezeCoolant market covering all its essential aspects.
