Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Automotive Axial Fan competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. An Automotive Axial Fan is a high-efficiency airflow device used in vehicles for engine cooling, battery thermal management, HVAC systems, turbocharger cooling and transmission oil cooling. In 2024, the global average price of an automotive axial fan is around US\$14.5 per unit, with global production reaching approximately 385 million units across internal combustion cars, hybrid vehicles and EV platforms. Gross margins typically range from 18%?34%, driven by brushless motor design, aerodynamic blade optimization, durability requirements and integration with vehicle thermal management systems. The supply chain includes upstream electric motors, plastics and composite materials, fan blades, controllers and bearings; midstream manufacturers perform fan assembly, motor integration, balancing, durability testing and automotive-grade certification; downstream customers include OEM passenger cars, commercial vehicle manufacturers, EV battery pack makers, HVAC module suppliers and Tier-1 automotive integrators. Automotive is a key driver of this industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their peak in the past 10 years, at 97.3 million and 95.89 million respectively. In 2018, the global economic expansion ended, and the global auto market declined as a whole. In 2022, there will wear units 81.6 million vehicles in the world. At present, more than 90% of the world's automobiles are concentrated in the three continents of Asia, Europe and North America, of which Asia automobile production accounts for 56% of the world, Europe accounts for 20%, and North America accounts for 16%. The world major automobile producing countries include China, the United States, Japan, South Korea, Germany, India, Mexico, and other countries; among them, China is the largest

automobile producing country in the world, accounting for about 32%. Japan is the world's largest car exporter, exporting more than 3.5 million vehicles in 2022.

The global Automotive Axial Fan market size was estimated at USD 5584.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.50% during the forecast period.
