Abstracts

This report mainly focuses on automotive blockchain market. Blockchain uses in the automotive industry include parts authentication, marketing interactions, financial applications, connected car and vehicle tracking, autonomous driving, car sharing, marketing, CO2 emission tracking, and many others. Blockchain technology in the automotive industry is used to hold data related to cars, including sales, warranty and insurance claims, and other operating costs. Previously, the record keeping process was done by having all process information stored by a third party or by a dedicated person.
