Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Automotive Brake Assembly and Testing Line competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Automotive Brake Assembly and Testing Line reached approximately 7,200 units, with an average global market price of around US\$ 130k per unit. The automotive brake assembly and testing line is an automated assembly and performance verification production line for systems such as brake calipers, brake pumps, brake master cylinders, ABS/ESC modules, and parking brakes (EPB). Through modules including robotic assembly, bolt tightening, seal pressing, piston assembly, hydraulic filling and bleeding, hydraulic pressure testing, response time testing, flow rate testing, NVH noise testing, durability bench testing, and a leak detection and traceability system, it performs full-process testing of the critical performance of the braking system. This equipment ensures that the braking assembly meets safety, durability, consistency, and regulatory requirements during mass production, and is a core automated piece of equipment for the production of braking systems in passenger cars, commercial vehicles, and new energy vehicles. The upstream of the brake assembly and testing line includes key components such as servo motors, sensors, hydraulic test benches, pressure/flow sensors, robots, PLC control systems, vision inspection systems, tooling fixtures, hydraulic pumps, and seal assembly stations. Major suppliers include Bosch Rexroth, Schneider Electric, Siemens, Keyence, Hikvision Industrial Vision, THK, HIWIN, NIDEC, and Denso Hydraulic Control Components. The midstream consists of automation system integrators such as D?rr, ATS, Comau, and Bosch, responsible for overall line planning, commissioning, and delivery. Downstream users include OEMs (Toyota, Volkswagen, Ford, BYD, Geely, SAIC) and braking system suppliers (Bosch, ZF, Shuguang Brake, Bethel, Mando, AP

Racing), used for mass production testing of products such as brake calipers, ESC/ABS modules, and EPB. The annual production capacity of a single-line Automotive Brake Assembly and Testing Line is approximately 200 units, with a gross profit margin of approximately 30%-45%.

The global Automotive Brake Assembly and Testing Line market size was estimated at USD 940.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.10% during the forecast period.
