Abstracts

Automotive Coatings adhesives and sealants are so versatile that they have been extensively applied in various forms in the automotive industry. Still, there are new applications that are being developed as cars and truck makers are demanding the production of better and higher performance products that can bond dissimilar materials so that they will function as one single unit. Sealants are widely used because of their capacity to fill gaps and voids, to be insoluble, to resist corrosion and to be flexible in avoiding relative movement of substrates. Compared to adhesives, they have lower strength, but they are more flexible. The demand for insulation, lamination, impenetrable flooring, coating, durable facades and other end-user requirements have induced increased production of high quality sealants and adhesives.

The global Automotive Coatings Adhesives and Sealants market size was estimated at USD 5970.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.90% during the forecast period.
