The automotive electric steering angle module is a next-generation technology that integrates the drive, braking, steering and suspension systems into each wheel of the vehicle. This is the secret to being able to drive in a completely different way from existing cars. Currently, the wheels of a car move by receiving power from a power link shaft (constant velocity joint) mounted on the car body. The direction of travel is also changed by the steering gear and steering link connected to the car body. In recent years, companies such as Continental, Hyundai Mobis and Protean Electric have increased their investment and have commercialized and mass-produced automotive intelligent steering angle modules.

The global Automotive Electric Corner Module market size was estimated at USD 146.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 15.80% during the forecast period.
