Report Overview

Rise in need for more storage space in a vehicle has prompted automakers to install foldable seats in their vehicles. Based on the direction of folding, there are two variants of foldable rear seats, viz., fold down seats and fold up seats. In case of a fold down seat, as the name suggests, the back rest of the seat is folded down. The seat turns a full 90 degree angle and rests on the seating area. In case of fold up seats, the seating area is folded in the upward direction, through 90 degrees angle. This enables the seat to rest on back rest area of the seat.

The global Automotive Foldable Rear Seats market size was estimated at USD 2850.42 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 7.35% during the forecast period.
