Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Automotive Glass Fiber Composites competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. This report studies Glass fiber reinforced plastic (GFRP) composites for automotive market. Glass fiber reinforced plastic (GFRP) composites refer to composite materials made of resin reinforced with glass fiber. GFRP composites is used for its high mechanical strength, light weight, corrosion and temperature resistant properties, thermal insulation, smooth internal surface, easy to form complex shapes, ease of repair and its cost effectiveness. The global automotive glass fiber composites market is experiencing significant growth due to the increasing demand for lightweight, high-strength materials in the automotive industry. This demand is driven by stringent environmental regulations, advancements in automotive design, and the rise of electric vehicles (EVs). Fuel Efficiency and Emission Reduction: Automotive manufacturers are under pressure to reduce vehicle weight to improve fuel efficiency and meet stringent carbon emission regulations, particularly in Europe and North America. Glass fiber composites, being lightweight and durable, are seen as an ideal substitute for heavier materials like steel and aluminum. Electric Vehicles (EVs): The rise of EVs is further driving the demand for lightweight materials. As EV batteries are heavy, manufacturers are increasingly using glass fiber composites in body panels, battery enclosures, and structural components to reduce overall vehicle weight and increase driving range. Global key players of automotive glass fiber composites include BASF, Lanxess, SABIC, Evonik, DSM, etc. The top five players hold a share over 29%. Asia-Pacific is the largest market, has a share about 43%, followed by Europe and North America, with share 30% and 22%, separately. In terms of product type, Thermoplastic Plastic Products is the largest segment, occupied for a share of 55%, and in terms of

application, Interiors and Others has a share about 37 percent.

The global Automotive Glass Fiber Composites market size was estimated at USD 4820.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.00% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Automotive Glass Fiber Composites market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights.
