Abstracts

Automotive logistics services (3PL and 4PL) refer to comprehensive logistics and supply chain solutions tailored for the automotive value chain, including OEMs, parts suppliers, and dealer networks. Third-party logistics (3PL) providers focus on operational execution such as transportation, warehousing, and distribution, while fourth-party logistics (4PL) providers integrate multiple 3PL resources, offering supply chain design, management, and optimization to ensure end-to-end visibility and cost efficiency. In recent years, with the globalization of automotive supply chains and the transformation of production models, automotive logistics services have evolved from traditional transportation to integrated supply chain management. Major automakers increasingly outsource warehousing, component distribution, spare parts management, and cross-border logistics to specialized 3PL and 4PL providers to reduce fixed costs and enhance flexibility.
