## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Automotive Steel Piston competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. An automotive steel piston is a critical engine component made from high-strength steel alloys. It moves up and down within the engine cylinder to compress the air-fuel mixture and transmits the force generated by combustion to the crankshaft. Compared to conventional aluminum pistons, steel pistons offer greater strength, heat resistance, and durability, making them well-suited for modern high-performance and high-pressure engines. The major players in global Automotive Steel Piston market include MAHLE, Kolbenschmidt Pistons, Tenneco, etc., and the market concentration rate is high. Europe is the main market, and occupies about 80% of the global market. Above 100 MM is the main type, with a share about 55%. Commercial Vehicle is the main application, which holds a share about 65%. The automotive steel piston market is experiencing steady growth, driven by increasing demands for engine efficiency and stricter emission regulations. Compared to aluminum pistons, steel pistons provide superior strength and thermal resistance, making them ideal for turbocharged gasoline engines and heavy-duty diesel applications. Leading global manufacturers such as MAHLE and Kolbenschmidt offer advanced engineering capabilities and global supply chains. Tenneco has strengthened its position in this segment through strategic acquisitions. In China, ZYNP Corporation plays a key role in the domestic piston market and is expanding into high-end applications. Hirschvogel Group and Yenmak are notable for their forging expertise and precision machining, maintaining strong positions in their respective regional markets. As hybrid vehicles and high-performance internal combustion engines continue to evolve, the entry barriers and technological requirements in the steel piston market are expected to rise, favoring further

consolidation.

The global Automotive Steel Piston market size was estimated at USD 320.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 13.80% during the forecast period.
