Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Automotive Steering Assembly and Testing Line competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Automotive Steering Assembly and Testing Line reached approximately 3,300 units, with an average global market price of around US\$ 220k per unit. A steering assembly and testing line is an automated production and quality-verification system designed for mechanical steering gear, EPS (Electric Power Steering), and EHPS units. It integrates automated assembly stations, servo-controlled tightening systems, press-fitting modules, rack-and-pinion assembly units, grease filling machines, torque/angle testing benches, NVH performance testers, endurance rigs, vision inspection units, traceability systems, and MES connectivity. The line ensures that critical steering parameters—such as backlash, returnability, torque curves, assist performance, and electronic response—meet stringent automotive safety and reliability standards. It is an essential component of both ICE and EV chassis manufacturing. The upstream of an automotive steering assembly and testing line consists of servo motors, reducers, sensors, tightening shafts, industrial cameras, pressure/flow detection modules, test benches, PLC control systems, tooling fixtures, and automated structural components. Major suppliers include Siemens, Schneider Electric, Bosch Rexroth, SMC, Keyence, Hikvision Industrial Vision, HIWIN, THK, and NIDEC. The midstream consists of assembly and testing line system integrators, responsible for overall line planning, mechanical design, control system development, software platform development, debugging, and delivery. Representative companies include Durr, ATS, Comau, and Bosch. Downstream users include OEMs (such as Toyota, Volkswagen, Ford, BYD, SAIC, and Geely) and steering system manufacturers (such as Bosch, ZF,

Nexteer, and FAW Faway). These systems are widely used in the manufacturing of steering systems for various passenger cars, commercial vehicles, and new energy vehicles. The annual production capacity of a single-line Automotive Steering Assembly and Testing Line is approximately 50 units, with a gross profit margin of approximately 30%-45%.

The global Automotive Steering Assembly and Testing Line market size was estimated at USD 738.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.60% during the forecast period.
