## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Automotive Sunroofs and Sunshades competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. The automotive sunroof is a glass structure on the roof of the car, enhances in-car air circulation, provides natural light, broadens the view, and creates a more spacious and comfortable environment, improving the overall driving and riding experience. Positioned beneath the sunroof, the automotive sunshade blocks direct sunlight, reduces UV damage, and offers privacy protection. Adjustable in design, it allows users to control shading based on sunlight angles. Together, the sunroof and sunshade form an integrated system that combines aesthetics, comfort, and safety in modern vehicles. The automotive sunroof system, consisting of the sunroof and sunshade, has evolved into a desirable feature in modern vehicles, driven by increasing consumer demand for comfort, aesthetics, and enhanced driving experiences. The sunroof, typically made of glass, allows natural light and fresh air into the cabin, improving ventilation and creating a more open and enjoyable environment. Meanwhile, the integrated sunshade plays a vital role in reducing heat and UV exposure, while also offering privacy and shading control. With growing urbanization, rising disposable incomes, and shifting consumer preferences toward premium features, the sunroof system is no longer limited to luxury cars; it is now widely adopted in mid-range and even compact vehicles. Technological advancements such as panoramic sunroofs, automatic open-close mechanisms, and smart glass integration further boost the market's appeal. Automakers and suppliers are investing in lightweight, durable materials and cost-effective designs to meet both performance and environmental demands. As vehicle design continues to prioritize user experience and cabin well-being, the automotive sunroof system market is expected to grow steadily, especially in

regions such as Asia-Pacific, where demand for enhanced in-car comfort is rapidly increasing.

The global Automotive Sunroofs and Sunshades market size was estimated at USD 8607.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.60% during the forecast period.
