## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Automotive Suspension Bushes competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Automotive Suspension Bushes are components used in vehicle suspension systems to provide a flexible connection between suspension parts, such as control arms, stabilizer bars, and shock absorbers, and the vehicle chassis. Typically made from rubber, polyurethane, or other elastomeric materials, these bushes absorb road shocks, reduce vibrations, and allow limited movement of suspension parts to enhance ride comfort, handling stability, and noise isolation. By cushioning and controlling the relative motion of connected components, suspension bushes help maintain proper alignment and minimize wear, contributing to overall vehicle safety and performance. Automotive is a key driver of this industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their peak in the past 10 years, at 97.3 million and 95.89 million respectively. In 2018, the global economic expansion ended, and the global auto market declined as a whole. In 2022, there will wear units 81.6 million vehicles in the world. At present, more than 90% of the world's automobiles are concentrated in the three continents of Asia, Europe and North America, of which Asia automobile production accounts for 56% of the world, Europe accounts for 20%, and North America accounts for 16%. The world major automobile producing countries include China, the United States, Japan, South Korea, Germany, India, Mexico, and other countries; among them, China is the largest automobile producing country in the world, accounting for about 32%. Japan is the world's largest car exporter, exporting more than 3.5 million vehicles in 2022.

The global Automotive Suspension Bushes market size was estimated at USD 2283.0
