Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Autonomous Emergency Steering Systems (AESS) competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Autonomous Emergency Steering Systems (AESS) are advanced safety technologies that automatically apply steering inputs to help a vehicle avoid imminent collisions when braking alone is insufficient. Using real-time data from cameras, radar, LiDAR, and other sensors, AESS can detect obstacles, pedestrians, vehicles, and other hazards, and autonomously steer the vehicle around them while maintaining stability and control. These systems typically work alongside Automated Emergency Braking (AEB), Lane Keeping Assist (LKA), and Adaptive Cruise Control (ACC) to enhance overall vehicle safety. AESS is a critical component in modern Advanced Driver-Assistance Systems (ADAS) and plays a key role in the development of higher-level autonomous driving capabilities. Autonomous Emergency Steering Systems are gaining traction as a critical component of advanced driver-assistance systems (ADAS), especially with the push toward Level 2+ and Level 3 autonomous driving capabilities. Stricter safety regulations and crash avoidance standards in Europe and North America are accelerating adoption across passenger vehicles. The market is focusing heavily on improving sensor fusion technologies that combine lidar, radar, and camera inputs to enable rapid and precise emergency steering maneuvers. Additionally, there's growing interest in retrofit solutions for commercial fleets, alongside the emergence of software-defined vehicles that allow these systems to receive continual performance updates via over-the-air (OTA) updates.

The global Autonomous Emergency Steering Systems (AESS) market size was

estimated at USD 3764.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.70% during the forecast period.
