Abstracts

Auxiliaries for pesticides, also known as pesticide adjuvants, are substances added to pesticide formulations or applied alongside them to enhance their performance, handling, stability, or application efficiency, rather than directly controlling pests themselves; these include surfactants to improve wetting and spreading, emulsifiers for uniform dispersion in liquid carriers, stabilizers to prevent degradation, antifoaming agents to reduce foam during mixing, and drift control additives to minimize off-target movement, all working synergistically with active ingredients to maximize efficacy, reduce application rates, and improve environmental and operational safety.

The global Auxiliaries For Pesticides market size was estimated at USD 3550.42 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 5.75% during the forecast period.
