Avermectin Pour-on Solution is a topical parasiticide containing avermectin as the active ingredient, which is absorbed through the skin into the bloodstream to provide long-lasting control of internal and external parasites. Formulated with specialized solvents and permeation enhancers, it rapidly penetrates the stratum corneum and distributes subcutaneously, effectively killing mites, lice, and gastrointestinal nematodes. Designed for ruminants like cattle and sheep, it is applied along the dorsal midline, eliminating the need for injections or oral dosing and minimizing stress. Key benefits include ease of use, prolonged efficacy (4-6 weeks of protection), and high safety margins. Avoid contact with eyes or wounds, and consider ambient temperature effects on absorption during application.
