Abstracts

Aviation full flight simulator (FFS) is a term used by national(civil) aviation authorities(NAA) for a high technical level of flight simulator. Such authorities include the Federal Aviation Administration(FAA) in the United States and the European Aviation Safety Agency (EASA).The flight simulator market is driven by multiple factors including expansion of commercial aviation, technological advancement, regulatory compliance, increase in military training, etc. Additionally, the flight simulator market is primarily driven by the continued demand for pilot training and certification. Flight simulators are widely used by airlines and aviation academies to train new and experienced pilots. This demand is driven by a global pilot shortage and the need to maintain high safety standards. The United States has one of the largest flight simulator industries. The presence of major aircraft manufacturers, increasing commercial flights, airlines, and military organizations contribute to the market size and dominance of the region. According to statistics provided by the Federal Aviation Administration (FAA), there are more than 40,000 flights every day in the United States alone, carrying 2.6 million passengers. Since the region has a large commercial aviation industry, pilot training is in high demand. Airlines, flight schools and military agencies rely on advanced flight simulators to train and certify pilots.

The global Aviation Full Flight Simulators market size was estimated at USD 8774.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.10% during the forecast period.
