## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Aviation Simulator competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global aviation simulator production reached approximately 11678 units, with an average global market price of around K US\$ 42 per unit. An aviation simulator is a highly simulated technical device used to simulate the operating environment, flight status and external conditions of an aircraft, providing pilots, aircrew or researchers with a near-real control experience. Market Concentration and Key Players: Internationally, the aviation simulator market is highly concentrated, mainly concentrated in developed countries such as Europe, America and Japan. For example, CAE and Thales and other large manufacturers; from the domestic point of view, aviation simulator manufacturers have Guangdong Youyi Aviation Technology and other enterprises. Manufacturing Processes and Market Trends: The manufacturing technology of aviation simulator takes high precision system integration as the core, involving high fidelity reproduction of simulated cockpit, six degrees of freedom motion platform, ultra-low delay visual system and real time computer modeling. The key technologies are to overcome high fidelity flight dynamics model, multi-subsystem cooperative control algorithm and millisecond response standard conforming to civil aviation D certification. In terms of market trends, global demand is driven by the expansion of civil aviation fleet and military modernization. The core growth points include VR/AR technology replacing traditional projection, AI-driven intelligent instructor system and LVC military training mode. Meanwhile, the localization process is accelerated. Local enterprises such as Beijing Blue Sky and Huayi Blue Sky gradually break through the barriers of high-end visual database and motion control algorithm to replace import share.

The global Aviation Simulator market size was estimated at USD 490.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.00% during the forecast period.
