## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Avionics Procedure Trainer competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Global sales of Avionics Procedure Trainers (APTs) are expected to reach approximately 2,400 units in 2024, with an average unit price of approximately \$38,900 per unit and an industry gross profit margin of approximately 29%. This device, equipped with a realistic avionics system, simulates an aircraft cockpit environment and is used to train pilots and crew members in avionics operation, procedure checks, and emergency procedures. Typical specifications include a highly realistic instrument panel, functional flight control/avionics switches, configurable systems for multiple aircraft types (e.g., B737, A320, helicopters), at least a 4K display system or panoramic projection, a programmable mission scenario engine, interactive training software, response latency below 20 milliseconds, and support for both networked and standalone training modes. Upstream raw materials include: aircraft aluminum alloy frames, high-reliability LCD/LED displays, touch panel controls, military-grade power modules, and high-precision servo drives. Typical suppliers include TE Connectivity, Analog Devices, Intel, Samsung Display, and Schneider Electric. Downstream customers primarily include airline training centers, flight academies, military aviation training bases, rental training service providers, and OEM aircraft training suppliers. Redbird Flight Simulations, a world-renowned trainer manufacturer, has an annual production capacity of approximately 150-200 units, primarily serving the general aircraft and flight academy markets.

The global Avionics Procedure Trainer market size was estimated at USD 93.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.80%

during the forecast period.
