Report Overview

Bacille Calmette-Guérin (BCG) vaccine is a live attenuated vaccine primarily used for the prevention of tuberculosis. It is derived from a strain of *Mycobacterium bovis* that has been weakened to reduce its virulence while still stimulating an immune response. The vaccine is administered through intradermal injection and is known for its ability to provide protection against severe forms of tuberculosis, particularly in children. BCG vaccination is recommended in many countries with a high prevalence of tuberculosis to reduce the burden of the disease.

The market for BCG vaccine is influenced by several key trends and market drivers. One significant trend is the increasing focus on preventive healthcare measures, especially in regions where tuberculosis is endemic. Governments and healthcare organizations are actively promoting vaccination programs to control the spread of tuberculosis, which drives the demand for BCG vaccine. Additionally, advancements in vaccine technology and manufacturing processes have led to improvements in the efficacy and safety profile of BCG vaccines, further boosting their adoption rates.

Market drivers for BCG vaccine include the rising global burden of tuberculosis and the need for effective prevention strategies. The World Health Organization (WHO) estimates that tuberculosis remains one of the top 10 causes of death worldwide, underscoring the importance of vaccination in high-risk populations. Furthermore, initiatives such as the Global Vaccine Action Plan aim to increase access to vaccines in low- and middle-income countries, creating opportunities for market growth. In addition, collaborations between governments, non-profit organizations, and vaccine manufacturers play a crucial role in expanding the reach of BCG vaccination programs,

driving market expansion and ensuring broader immunization coverage.

The global Bacille Calmette-Guérin Vaccine market size was estimated at USD 158.24 million in 2024 and is projected to reach USD 256.04 million by 2033, exhibiting a CAGR of 6.20% during the forecast period.
