Report Overview

A Ballistic Reserve Parachute is a safety device designed to deploy in case of emergency during activities such as skydiving, BASE jumping, or paragliding. It is a compact parachute system that is typically stored in a container attached to the main harness of the user. In the event of a primary parachute failure or other emergency situation, the ballistic reserve parachute can be deployed quickly to slow down the descent and ensure a safer landing for the user. This product is crucial for individuals engaging in high-risk activities where the primary parachute may malfunction, providing an added layer of safety and peace of mind.
