The baobab tree is one of the largest and oldest trees in the world – carbon dating indicates that these trees can live 3,000 years or more. In addition to providing food and shelter, the fruit, leaves, and bark of the mighty tree have been used medicinally for centuries in natural remedies for everything from fever to digestive issues. The fruit of the tree resembles a large mango or coconut measuring up to 18cm long and weighing around 1.4kg. It consists of a hard outer shell filled with pulp that dehydrates naturally as the fruit matures. When the pulp of this fruit is ground into powder it is known simply as baobab powder.
