Abstracts

Bar top corks are usually cork stoppers that can be made from natural or synthetic material. Bar top corks are largely used to deliver effective sealing for bottled liquefied products with subsequent re-use and easy manual extraction. The food market includes both fresh and processed foods. According to our research, the global food and beverage market has a sales revenue of approximately US\$10 trillion. China is the world's number one food and beverage market and the world's number one food and beverage producer. In the market drivers section, the total consumer spending forecast shows that consumption at home is growing faster than consumption away from home.
