## Abstracts

Bare thermocouple wire refers to a type of electrical wire that is used in thermocouples for temperature measurement. It is typically made of two dissimilar metals joined together, which generates a voltage signal when exposed to different temperatures. Bare thermocouple wire is designed to be extremely accurate and reliable, and is often used in industrial and scientific applications where temperature measurement is critical. It is often available in very small diameters to allow for precise temperature measurement in tight spaces. It is named "bare" because it does not have any insulation or protective coating on it. Bare Thermocouple Wire is wire without any insulation. Normally it is sold on a spool and ordered as a pair. Usage is typically for making a small thermocouple in applications requiring special considerations. Bare Thermocouple Wires are available for the element types K, T, J, E, N, S, R, B. Bare thermocouple wires are used when an insulation of the legs is not necessary, or if the temperature is very high so that normally used materials do not withstand. In this report, bare thermocouple wire only counts the thermocouple grade and wire form type. There are many manufacturers of bare thermocouple wire in the world, Sandvik (Kanthal), Aperam, Isabellenhütte, Furukawa Techno Material, OMEGA Engineering, Thermo-electra, Pyromation, Pelican Wire, Thermo Sensors, Yamari Industries, Concept Alloys, Nanmac, TMH GmbH, etc. are large companies in the market of bare thermocouple wire. Sandvik (Kanthal) is the global leading for sale of bare thermocouple wire, which makes up about 16% of the market share in terms of revenue. The main sales areas of bare thermocouple wire are in North America and Asia-Pacific, which together account for about 60% of the global revenue market share. The Asia-Pacific market plays an important role in driving the development of the global market, thanks to the rapid growth of China, Japan in particular. Benefit from extensive downstream demand. It is expected that the bare thermocouple wire market will continue to maintain a steady growth rate about 4%-5%. Among them, the glass and ceramics industry application

market accounted for the world's largest market share, accounting for close to 15% of the global bare thermocouple wire sales volume market share.

The global Bare Thermocouple Wire market size was estimated at USD 210.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.50% during the forecast period.
