Report Overview

Barium sputtering target is made of high purity Barium metal. Barium is the fifth element in group 2 and is a soft, silvery alkaline earth metal. Because of its high chemical reactivity, barium is never found in nature as a free element. Its hydroxide, known in pre-modern times as baryta, does not occur as a mineral, but can be prepared by heating barium carbonate. The most common naturally occurring minerals of barium are barite (barium sulfate, BaSO_4) and witherite (barium carbonate, BaCO_3), both insoluble in water. The name barium originates from the alchemical derivative ?baryta?, from Greek ????? (barys), meaning ?heavy.?
