Abstracts

Basalt ropes and sleeves are specialized high-temperature insulation products manufactured from continuous basalt fibers, which are derived from molten volcanic rock and processed into woven or braided textile forms; these materials exhibit exceptional thermal stability, maintaining structural integrity and insulating properties at temperatures up to 900°C, while offering advantages such as non-combustibility, resistance to chemical corrosion, low thermal conductivity, and flexibility, making them suitable for demanding applications including fire protection systems, industrial furnace insulation, exhaust wrapping, and thermal management in aerospace and automotive sectors where traditional materials like fiberglass or ceramic fibers may fall short in performance or durability.

The global Basalt Ropes And Sleeves market size was estimated at USD 85.5 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 8.15% during the forecast period.
