### Report Overview

Every baseball game will feature three standard bases on the diamond: first base, second base, and third base. Baseball bases can serve a few different functions during a game. They help create boundary lines, which determines whether a ball will be considered in play or foul. Specifically, first and third base assist in marking these boundaries. Overall, the bases serve as designated points on the field that a runner must touch in order to score a run. This means that a runner must touch first base, second base, and third base before crossing home plate and earning a run for their team. If a player is on base during a baseball game, they are designated as safe. Each base has a length and width of 18 inches.
