The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Batana Oil competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. The supply chain involves harvesting, kernel cracking, roasting, grinding, and boiling to extract the oil, which is then filtered, packaged, and distributed to cosmetic brands and traders for use in premium personal care products. In 2024, global Batana Oil production was about 2,800 tons, with a capacity of 3,600 tons. Prices ranged from USD 22,000 to 45,000 per ton, and manufacturers achieved an average gross margin of 42%.
