### Report Overview

Bathroom explosion-proof film is a safety protective material commonly used on bathroom glass doors or windows to prevent dangerous fragments of glass in the event of accidental impact or breakage. Bathroom explosion-proof membrane is made of a special layer of polyester film with high strength and impact resistance. When the glass is impacted or broken, the explosion-proof film can adhere firmly to the glass surface and prevent glass fragments from flying. This prevents personal injury and further property damage. Bathroom explosion-proof film can not only provide safety protection, but also effectively block the intrusion of ultraviolet rays, and play the role of heat insulation, sound insulation and dust prevention. It has high transparency and will not affect the lighting effect and aesthetics of the bathroom.
