Abstracts

A glass bottle preserves the freshness and taste of its contents, while offering that celebratory clink, so it’s perfect for beer. An amber glass beer bottle provides 99.9% protection from UV rays, and glass is a great insulator, so it keeps beer colder longer than any other type of single-serve packaging.The growing consumption of craft beer as one of the primary growth factors for the beer packaging market. Consumers are increasingly preferring craft beer brewed by small and independent brewers and the popularity of craft beer is increasing in the US and the European countries. It has been observed that craft breweries accounted for 99% of the operating breweries in regions such as Virginia, Florida, North Carolina, and Texas. The growing demand for craft demand is inducing the establishment of several new small and independent craft brewers across the globe, contributing to the growth of the beer packaging industry.

The global Beer Packaging market size was estimated at USD 18260.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 1.80% during the forecast period.
