Abstracts

Belt Drive Tube Axial Fans is a tubular axial flow fan which connects a motor with an impeller through a belt drive system. Its core structure includes impeller, casing, pulley, transmission belt and motor. The working principle is based on the characteristics of axial flow fan: the gas flows axially parallel to the fan, the blade pushes the air to generate kinetic energy when the impeller rotates, and the kinetic energy is converted into pressure energy through the guide vane and diffuser tube, and finally the air is transported to the pipeline system.
