Report Overview

Beverage cans are used for different non-alcoholic beverages, such as CSD, energy drinks, and juices. It is observed that the popularity of metal cans is increasing among consumers. This is mainly because beverage cans have a better hermetic seal and good barrier against oxygen and sunlight, thereby retaining the taste of the beverage. The beverage can market is expected to witness significant growth over the forecast period primarily owing to superior cooling properties and storage space reduction by using advanced materials in beverage cans manufacturing. The industry is expected to witness high growth owing to increasing consumption of alcoholic beverages such as beer and cider which are required to be cooled at a specific temperature for enhanced taste.
