## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Beverage Straw Attachment Machine competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. The Beverage Straw Attachment Machine is a device designed to automatically attach straws to packaged products. It is widely used in soft bags, cartons, and plastic cups for beverages such as juice, milk, and jelly, as well as snack foods. By automating the straw feeding, cutting, gluing, and attaching processes, the machine improves production efficiency, ensures precise and secure attachment of straws, and enhances product appearance consistency and convenience. It is often used at the end of automated packaging lines. Sales volume in 2024 is expected to be 5,500 units, with an average price of US\$50,000 per unit. The upstream players in Beverage Straw Attachment Machine primarily include straw manufacturers, hot melt or cold glue suppliers, and manufacturers of packaging materials (such as cartons, soft bags, and plastic cups), along with the integrated filling and sealing equipment. After filling and sealing, the entire packaging line typically uses a conveyor system to transport the product to the straw applicator, achieving fully automated integration and improving overall production efficiency. Downstream players include food and beverage companies, dairy companies, children's nutrition brands, and their contract manufacturers, who directly market the finished products with straws. These products typically enter retail outlets, supermarkets, and e-commerce platforms. The quality and efficiency of straw applicators directly impact the packaging aesthetics, user experience, and product added value.

The global Beverage Straw Attachment Machine market size was estimated at USD 275.0 million in 2025 and is projected to grow at a compound annual growth rate

(CAGR) of 4.50% during the forecast period.
