Report Overview:

Blood glucose monitoring is the use of a glucose meter for testing the concentration of glucose in the blood. Particularly important in diabetes management, a blood glucose test is typically performed by piercing the skin (typically, on the finger) to draw blood, then applying the blood to a chemically active disposable 'test-strip'. Different manufacturers use different technology, but most systems measure an electrical characteristic, and use this to determine the glucose level in the blood. The test is usually referred to as capillary blood glucose.

In this report, we study blood glucose test strips and blood glucose meter.
