Abstracts

Bicycle shock absorber oil is a liquid specially used in bicycle suspension systems. It mainly plays the role of lubrication, damping control, cooling and corrosion and rust prevention. It reduces friction, improves performance and extends service life by lubricating the moving parts inside the shock absorber. At the same time, it adjusts the damping response of the shock absorber according to different viscosity characteristics to improve riding comfort and stability. The right shock absorber oil can also help dissipate heat to prevent overheating from damaging the function of the shock absorber.
