Building Information Modeling (BIM) services refer to the use of digital technology and software to create a collaborative and data-rich 3D model of a building or infrastructure project. BIM services offer numerous benefits throughout the entire project lifecycle, from design and construction to operation and maintenance. BIM services have transformed the architecture, engineering, and construction (AEC) industry, becoming an integral part of modern construction projects. BIM software allows stakeholders, including architects, engineers, contractors, and facility managers, to collaborate more effectively and efficiently throughout the project's lifecycle.
