A thermometer is a device, which is utilized for the measurement of temperature or temperature gradient of a body or a medium that finds its use in a wide number of applications, such as, scientific research, medicine, study of weather and various control and regulatory processes. Bimetallic thermometer is a type of on-site measurement instrument, which is suitable for measuring middle and high temperature, and can be used to measure directly the temperature of gasses and liquids. The bimetallic thermometer consists of a bimetallic strip. This bimetallic strip is made of two thin strips of metals that have different coefficients of expansion. These two metal strips are conjoined together by brazing, welding or riveting so that the relative motion between them is restricted. With expansion of various metals an alloys for various operations will bring in a strong demand for bimetallic thermometer and gradually it will gain strong foothold in market with rise in usage.

Bimetallic Thermometer has a widespread utilization in various industrial installation. The factors, which will be driving the bimetallic thermometer market is its use in various control devices. Control devices are an integral part of various equipment since it acts as an interface between human and machine through which machine or equipment is being controlled as desired. Bimetallic thermometer is also used in air-conditioning thermostats. Globally the sales of air-conditioning has been increasing moreover various new line of air-conditioning unit which guarantees of being environment cum budget friendly have been launched in market and its gaining a strong customer demand. Such a scenario will again boost the market of bimetallic thermometer. The helix strip in bimetallic thermometer has also individual uses in process application such as in refineries, oil burners, tyre vulcanizers etc., Compared to mercury filled glass thermometer bimetallic thermometer is more robust, in expensive and efficient to be used in industries and various industrial process. Therefore, bimetallic thermometer will

have wider rate of acceptance from industrial sectors.
