### Report Overview

Volatile petroleum prices and increase in awareness on fossil fuels' contribution towards climate change are attracting interest towards bio-based products. Gasoline prices are volatile due to fluctuating crude oil prices. Reducing dependence on petroleum-based fuels, price volatility, and supply disruptions are the primary reasons behind the introduction of energy policies, which is driving the bioethanol market. Bioethanol could be the primary alternative source of fuel for the transport sector which is highly dependent on crude oil-based fuels (gasoline).

With the increasing percentage of bioethanol in blended fuel, the dependency on gasoline will reduce and be less vulnerable to transportation fuel price fluctuations. Bosson Research's latest report provides a deep insight into the global Bio Ethanol Gasoline market covering all its essential aspects.
