Abstracts

Bio fiber facial masks represent a specialized segment within the broader skincare and beauty industry, characterized by their use of biodegradable, plant-based materials such as bamboo, cotton, or cellulose fibers to create ultra-thin, highly absorbent sheet masks infused with serums and active ingredients. These masks are designed to provide enhanced adherence to facial contours, allowing for deeper penetration of hydrating, brightening, or anti-aging compounds compared to traditional non-woven or hydrogel alternatives. The bio fiber composition appeals to environmentally conscious consumers seeking sustainable, eco-friendly beauty solutions, while the product's functionality aligns with rising demand for high-efficacy, single-use treatments that deliver visible results in minimal time. Market positioning typically targets mid-to-premium price segments, emphasizing natural ingredients, skin compatibility, and reduced environmental impact.
