Report Overview

Environmentally friendly alternatives to traditional products is becoming increasingly easy these days. As more products become available, the more choices we have when it comes to combining green living with contemporary life. In one way or another, packaging materials touch every part of our life. From food packaging through to the packaging of parcels and packages, our use of packaging materials is surprisingly extensive. The growth in the amount of packaging that we use in our daily lives has had an impact on the amount of waste that is generated. Waste that cannot be reused or recycled ends up in landfills where it is left to rot for many years or, in some instances, the packaging is made from materials that will never decompose. By seeking biodegradable and recyclable alternatives we help the environment. Paper and cardboard – paper and cardboard is reusable, recyclable and biodegradable. There are a number of advantages to this type of packaging product, not least the fact that they are readily available. Many packaging manufacturing companies offer an environmentally friendly option which has been created using a high proportion of recycled paper.
